Big Data Project 2025

# NYC Parking Tickets

Lukas Zandomeneghi | Miriam Palmetshofer

# **DATASET**

- NYC Parking tickets
- Collected every year since 2014 (~10M per year)
- 43 columns like Plate ID, Violation Code, Issue Date, etc
- fiscal year **2014**, which spans from July 1, 2013, to June 30, 2014

# **TECHNOLOGY STACK**

#### Data processing:

- Preprocessing
- Filtering
- Aggregating

## Search and Indexing:

- Stores data from Spark
- Fast and scalable search

#### Data Visualization:

- Fetches data from Elasticsearch
- Lots of visualization possibilities

# **RESEARCH QUESTIONS**

- 1. Do **repeat offenders** cluster in certain areas or vehicle types?
- 2. Are parking violations more common during certain times of day or days of the week?
- 3. Define **hotspots** of parking violations.
- 4. Analyse the **enforcement strength/severity** of the **agency.**

Do repeat offenders cluster in certain areas or vehicle types?

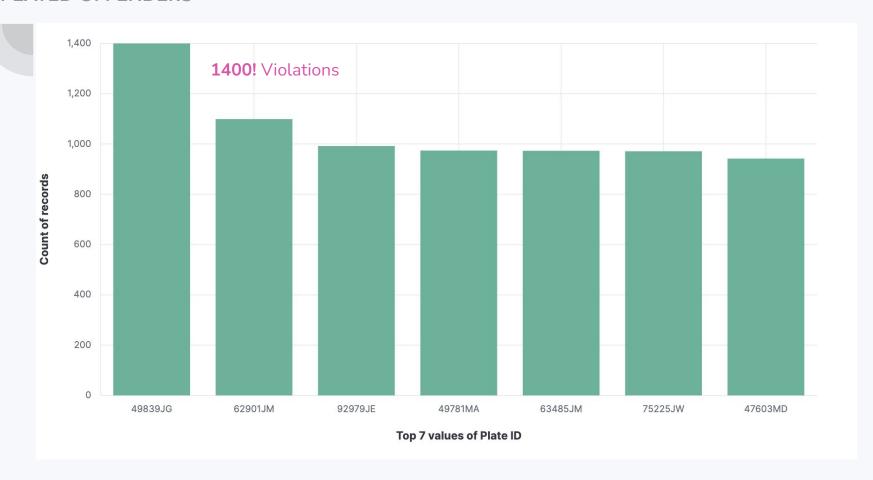

Unique count of plate\_id for repeated offenders

12,2%

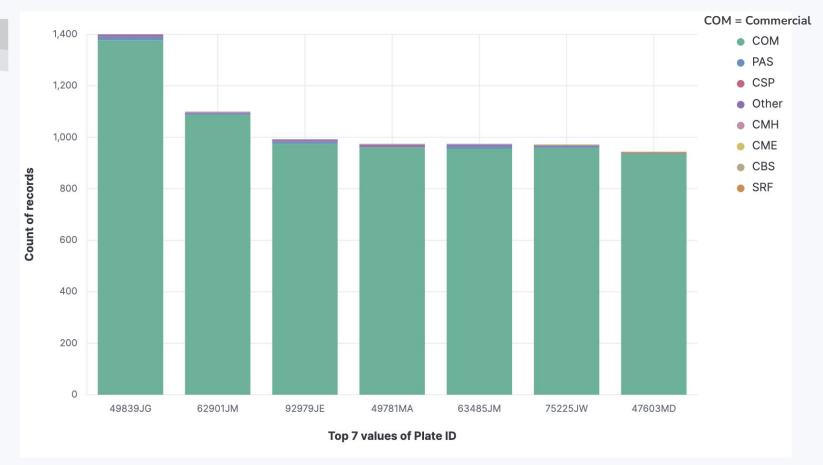

2,719,581

334,103

#### **REPEATED OFFENDERS**

# REPEATED OFFENDERS – Plate type

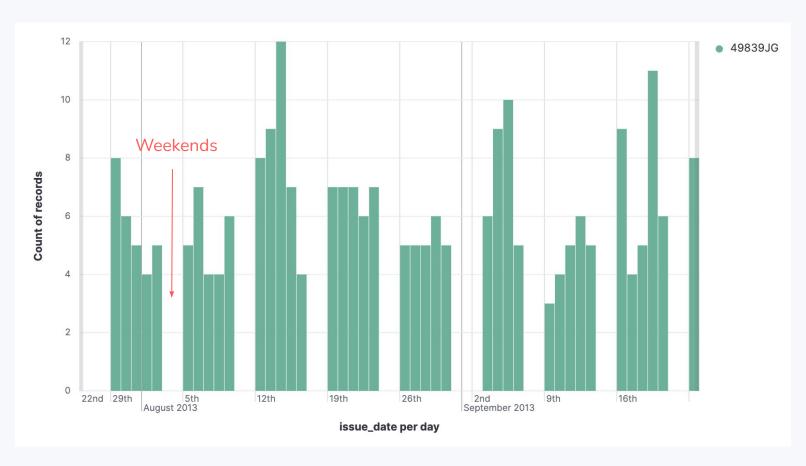

## REPEATED OFFENDERS – Plate lookup

- Plate lookup with https://www.lookupaplate.com/new-york
- Top 3 are UPS trucks, very likely that others are delivery trucks as well (e.g. 47603MD is also a truck)

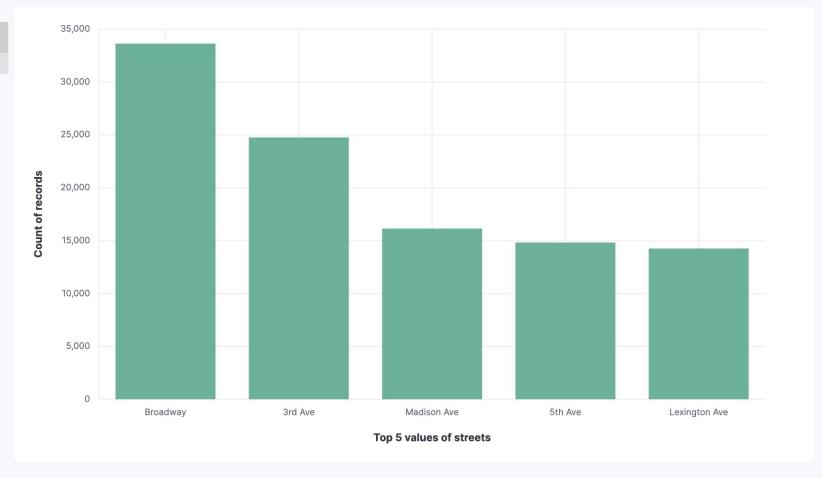

### **REPEATED OFFENDERS – violation times**

### **REPEATED OFFENDERS** – most common streets

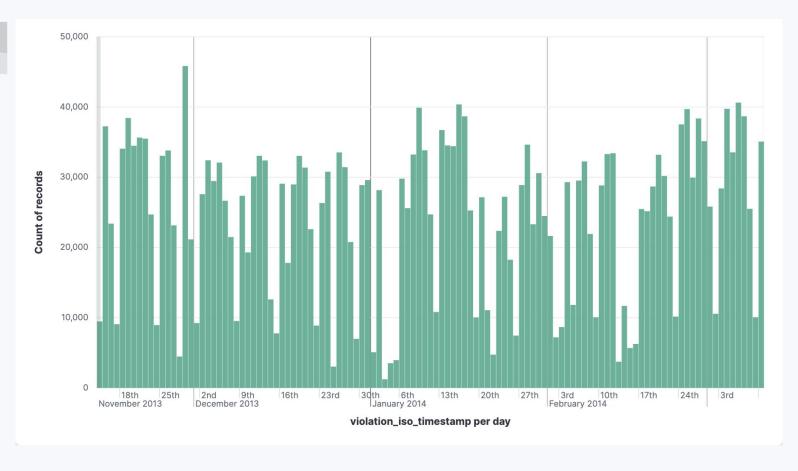

#### **REPEATED OFFENDERS – Streets**

- High Traffic Volume
- Commercial and Delivery Zones
- Strict Parking Regulations

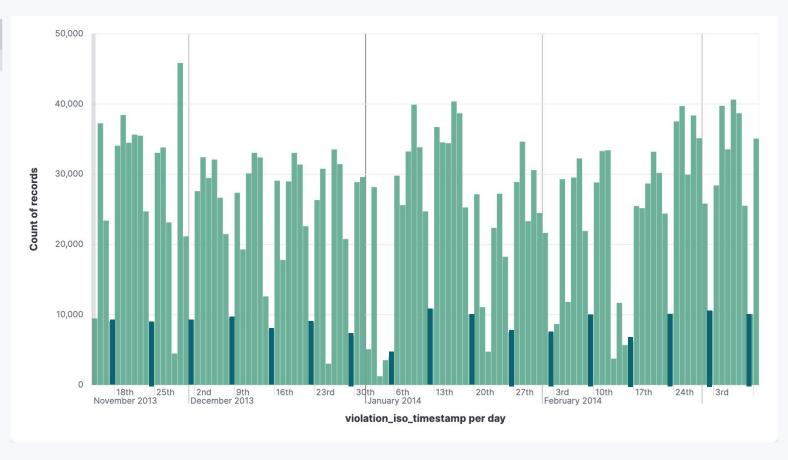

Are parking violations more common during certain times of day or days of the week?

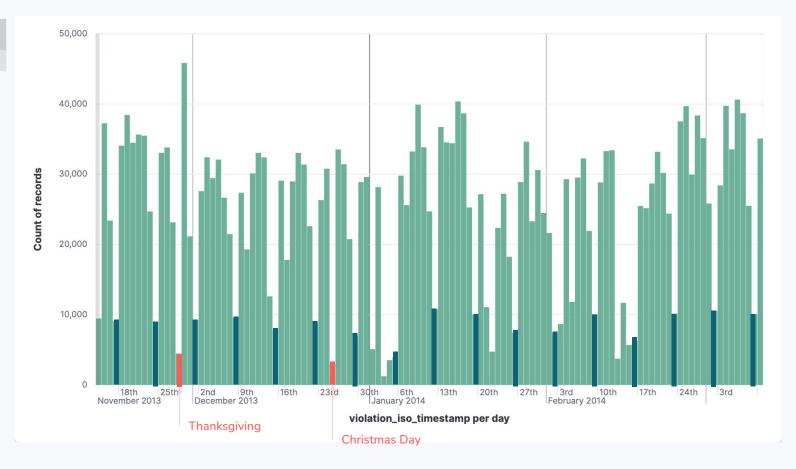

#### TIME ANALYSIS – 14th Nov - 14 March 2013

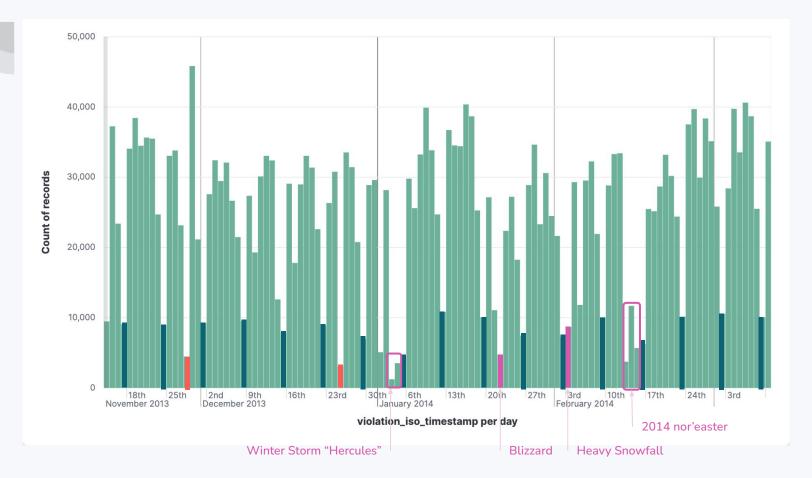

# TIME ANALYSIS – Sundays

# TIME ANALYSIS – Holidays

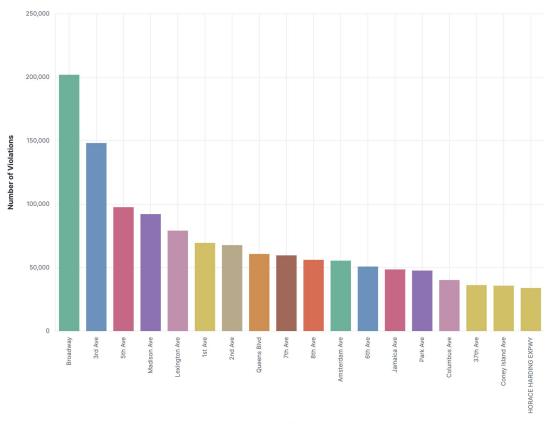

#### TIME ANALYSIS - Snow storms

# R3

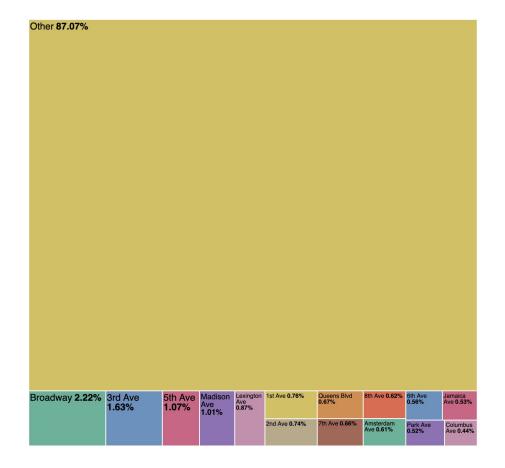

Define hotspots of parking violations.

#### **HOTSPOTS - Streets**

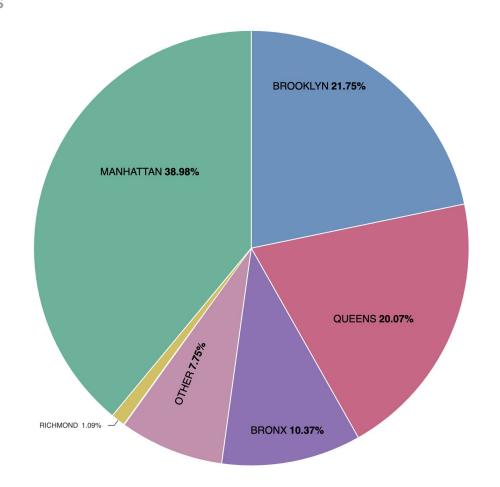

- Correlate with findings of RQ2
- More popular and important streets → more violations

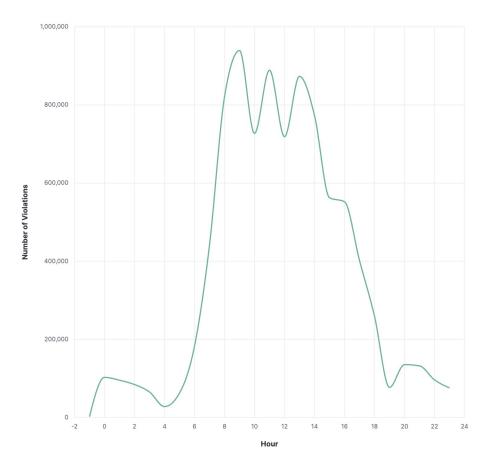

#### **HOTSPOTS - Streets**

## **HOTSPOTS - Counties**

# **HOTSPOTS** - Throughout Day

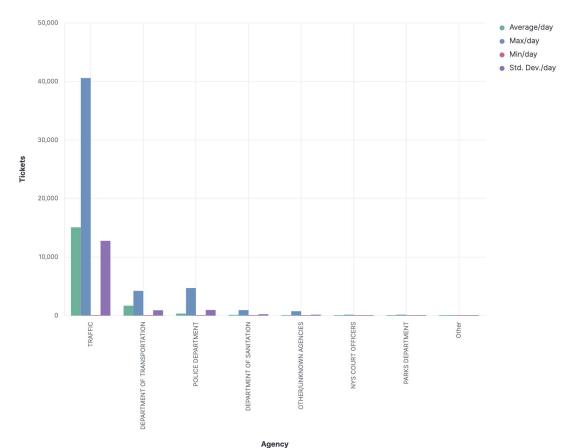

- More tickets during day → Business hours
- Lunch break is visible

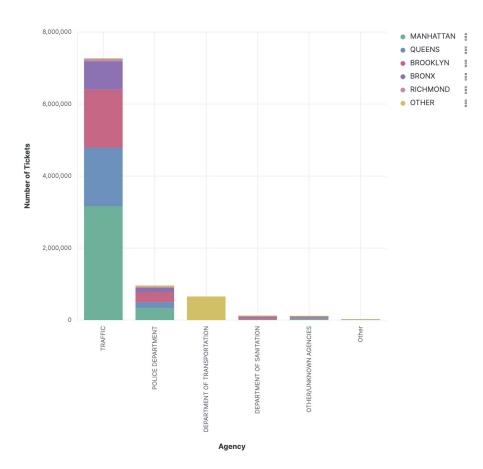

# **R4**

Analyse the enforcement strength/severity of the agency.

# AGENCY ENFORCEMENTS - Tickets per Agency

# AGENCY ENFORCEMENTS - Tickets per Agency and County

# Pitfalls and Problems

# PITFALLS AND PROBLEMS

- Setup of the Tech Stack (Problems with the docker container)
  - Missing user in spark image
  - Missing jars in spark image
- Timestamps in Elasticsearch/Kibana
- Writing to Elasticsearch
  - Appending → Needed to change mode to overwrite
